

3.1 Top Reasons to Upgrade to the New Immediate System

And why you will want to right away!

1. Expanded “Anyfile” Capability

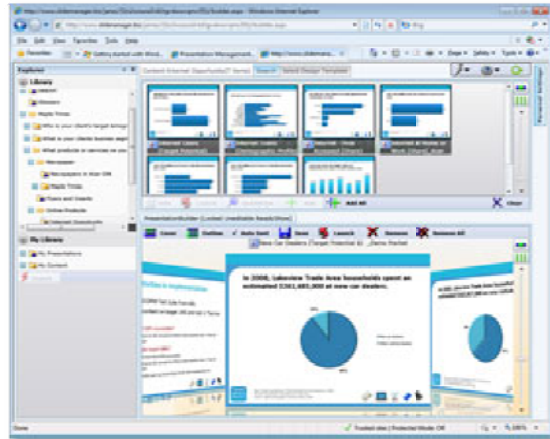

- Provide your presenters with any file type to swiftly create complete presentations and supporting documents
- File types include: PDF, Excel spreadsheets, Word documents, video or any Macintosh or Window file type
- Presenters find everything they need in one place
- Packaging of movies and other embedded objects
- You can wait and implement this when you are ready... it will not need to be learned when you upgrade to version 3.1

Result: Eliminate wasted time looking for any file you need i.e. “leave behinds”, forms, sales materials; anything (rate cards, contracts, spec ads, logos); a true “one stop shop” for all presentation, proposal and related needs!

2. Faster and Better Presentation Building

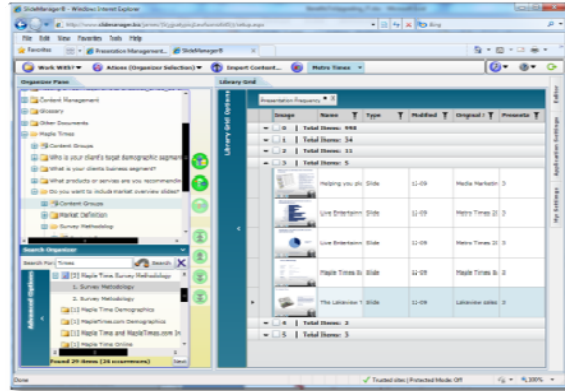

- Rapid to learn visual interface and slide selection makes it easy to find the slides and build your presentation
- Reduced system requirements speeds up slide views, application interaction and IT overhead
- Added workflow benefits including shortcuts, drag and drop and more right click functions
- Find, recognize and select slides in thumbnail or full zoomed views
- Slide Duplication checker warns a presenter of the same slide included twice

Result: More presentations, more audience face time, more complete and targeted presentations.

3. Faster and Better Content Management

- Consolidated work screens, context menus, more right-click options
- Updating content can be done in a fraction of the time
- Built-in recovery of deleted content
- Version tracking capability
- Increased import and assign options
- Duplication management tools
- Custom screens
- Enhanced Copy functions

Result: You can do more, faster. Smarter libraries, faster implementation, less training, more and better information for your presenters, less time required for monotonous task means more time for strategic and high level task.

3.1 More Features to Improve Your System

- Increased browser compatibility - Mac OS X, Linux or Windows
- Less IT overhead
- Less and wider PowerPoint support
- Updated operating system capability – Mac OS X or Linux
- Enhanced Help support
- Archiving as you update content
- Enhanced Copy functions
- New Download features

Result: Compatible with more systems and platforms, less IT ActiveX work, enhanced training support, functions, and management preference options. It also works with PowerPoint 2007 and most earlier versions (even free PowerPoint alternatives for most task)

Oh, and 3.1 is available at no extra charge to all current Immediate clients!

We also include lots of webinars, recordings and quick reference guides.
